

## MIMIK

Linn's expertise in the design and production of source products has been recognised since the introduction some 21 years ago of the LP12 turntable, which revealed the enormous impact a quality source component could have on the performance of a hi-fi system. Continuing commitment to accurate music reproduction led Linn to develop its other outstanding source products - the Kremlin FM tuner, the Karik CD player and the Numerik D-A Converter.

The Mimik is true to Linn's innovative engineering tradition and offers exceptional value, ease of use and performance. The Mimik will enhance the sound of almost any hi-fi system and, when combined with the Linn Majik control amplifier and Sekrit loudspeakers, an outstanding entry level Linn system can be configured. As with all Linn equipment, this system not only offers true high-fidelity performance, but also creates a system which can be upgraded and expanded for many years to come.

Designed to satisfy the needs of the many thousands of music lovers who remain committed to vinyl and have been waiting for an affordable quality player to allow them to access CD to the standard they expect, the Mimik delivers the performance and value they have been waiting for.

The Mimik is available only through Authorised Linn Retailers all of whom have comprehensive demonstration, installation and service capabilities. They will be pleased to advise customers on all aspects of their hi-fi and can arrange to let them experience what the Mimik can do in their own home.

### Product Features

- . Non-degradable solid-state switching and microprocessor control
- . Delta-sigma converter for accurate data conversion
- . Reliable, shock-resistant transport, and easily replaceable laser pickup assembly
- . Advanced error correction to tolerate imperfect disc quality
- . Industry standard digital audio interface to work with external D-A Converter
- . Two audio outputs for primary system and distributed sound
- . Electrical Remote Control socket for remote switch-on of other Linn products and direct connection to Linn Knekt multi-room sound distribution equipment
- . The Mimik has its own dedicated remote control handset, and will also respond to commands from the most advanced Linn handset which can control an entire system.

### Mimik Technical Information

### Audio Outputs

Connectors: 2 pairs RCA phono  
Level: 2 Vrms (for peak code)  
Impedance: 100 Ohms  
Min Load: 1000 Ohms

### Digital Output

Connector: BNC  
Format: S/P-DIF  
Accuracy: 44.1kHz +/-50ppm

### Conversion Technology

1 Bit Delta-Sigma

### Mains Supply

100/120/220/240V +/- 10%

### Power Consumption

< 20W

### Size

W 320 x D 326 x H 80mm

### Weight

4kg
